REISSUE

REMARKS

In light of the amendments to the application noted above and remarks to follow, reconsideration and allowance of the above-referenced application are respectfully requested.

Claims 1-38 are pending. Claims 1-14 are the original patent claims and stand unamended. Claims 15-38 are previously added claims. Claims 27 and 30 are amended herein. Claims 15-26, 28, 29 and 31-38 stand unamended.

Claims 30-32 were rejected under 35 U.S.C. 112, first paragraph as allegedly failing to comply with the written description requirement. Applicant has amended claim 30 and therefore requests that the rejection of these claims under 35 U.S.C. 112, first paragraph be withdrawn. Furthermore, support for "generating all of pixel data, representing pixel values of said high definition video signal" is found on column 5, line 32 - column 6, line 36 of U.S. Patent No. 5,517,588.

Claims 27-29 were rejected under 35 U.S.C. 112, second paragraph as allegedly indefinite. Applicant has amended claim 27 and therefore requests that the rejection of these claims under 35 U.S.C. 112, second paragraph be withdrawn.

Furthermore, dependent claims 28, 29, 31 and 32 depend, either directly or indirectly, from one of independent claims and are therefore allowable as depending from allowable independent base claims. Additionally, each of these claims presents an independently patentable combination in and of its own right, and is therefore patentable for this additional reason.
